Procedural information provides the steps that a user must follow in order to complete a task.

Use ordered lists to describe tasks with multiple steps. If a procedure takes more than 10 actions, consider breaking it into smaller, more manageable sub-procedures.

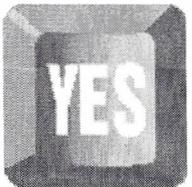

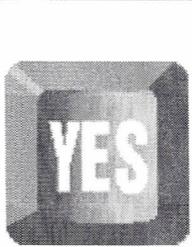

Click the **QUICK TIPS** button to display additional information.

How to Introduce a Procedure

- Start with an opening paragraph that introduces the procedure and provides the context for it. Give location first, action second.
- Use an imperative sentence or an infinitive phrase to define the scope; punctuate the end of the statement with a colon.

	<p><i>Installing My Reports Manager</i></p> <ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>Select a feature.</i> 3. <i>...</i>
	<p><i>Installing My Reports Manager</i></p> <p><i>To install My Reports Manager:</i></p> <ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>Select a feature.</i> 3. <i>...</i>
	<p><i>Installing My Reports Manager</i></p> <p><i>Use the following procedure to install My Reports Manager.</i></p>

	<p><i>Steps</i></p> <ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>Select a feature.</i> 3. <i>...</i>
	<p><i>Installing My Reports Manager</i></p> <p><i>To install My Reports Manager, complete the following steps. This procedure will install the program in the default location.</i></p> <ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>Select a feature.</i> 3. <i>...</i>

How to Describe the Steps

- Write one step for **each** significant user action.
- Use arrows to show a sequence of menu selections.
- Start the first sentence of each step with an imperative (Click, Select, Press, etc.).
- If an ellipsis (...) is included in the label, do **NOT** include the "..." in the description.

	<ol style="list-style-type: none"> 1. <i>...</i> 2. <i>Click File.</i> 3. <i>Click Print...</i> 4. <i>...</i>
	<ol style="list-style-type: none"> 1. <i>...</i> 2. <i>Click File --> Print.</i> 3. <i>...</i>

- If the user must press the **Enter** key to complete the action, include it as part of the step, **NOT** as a separate step.

	<ol style="list-style-type: none"> 1. ... 2. <i>Type your first name.</i> 3. <i>Press Enter.</i> 4. ...
	<ol style="list-style-type: none"> 1. ... 2. <i>Type your first name, then press Enter.</i> 3. ...

- **Do NOT use "please"** in any instructions.
- When a task consists of only one step, write it as a short sentence and do **NOT** number it.

How to Describe the Results of a Step

- **Never** describe the results of a step in the next step.

	<ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>The Installation window lists the available features.</i> 3. <i>Select a feature.</i> 4. ...
	<ol style="list-style-type: none"> 1. <i>Click Install Program; the Installation window displays.</i> 2. <i>Select a feature.</i> 3. ...

	<ol style="list-style-type: none"> 1. <i>Click Install Program. The Installation window displays.</i> 2. <i>Select a feature.</i> 3. ...
	<ol style="list-style-type: none"> 1. <i>Click Install Program.</i> 2. <i>In the Installation window, select a feature.</i> 3. ...

How to Describe Non-Sequential Steps

- Do **NOT** write non-sequential steps in a sequential manner.
- Present the branching condition in a single step, using a sub-list for the alternative actions.
- Avoid using "or" between alternatives.

	<ol style="list-style-type: none"> 3. <i>If you have previously saved your report, click the Save icon and go to step 5. OR</i> 4. <i>If you have NOT previously saved your report, click the Save As icon and type a report name.</i> 5. ...
	<ol style="list-style-type: none"> 3. <i>Use one of the following procedures:</i> <ul style="list-style-type: none"> ■ <i>If you have previously saved your report, click the Save icon.</i> ■ <i>If you have NOT previously saved your report, click the Save As icon and type a report name.</i>

How to End a Procedure

- A step-by-step procedure usually ends with the user saving the work; avoid closing any open windows or returning to a previous point.
- Never include actions that are outside the scope of the procedure.
- Do **NOT** include steps for another procedure.
- Direct the user to any subsequent procedures by including a cross-reference or a link in the final step.
